### **DETAILED ACTION**

In paper no. 17, applicant amended claims 15-24, 35 and 40. Claims 15-47 are pending.

#### ***Election/Restrictions***

This application contains claims 25-34 drawn to an invention nonelected with traverse in Paper No. 13. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

#### ***Sequence Compliance***

The specification remains objected to for failing to adhere to the requirements of the sequence rules.

Applicant has requested clarification for which sequence rules have been violated.

A specific example within the instant application violating the sequence rules is located on page 9, line 25. (There are equivalent sequence violations within the specification that have not been cited here.) 37 CFR § 1.821, also discussed in the MPEP § 2242, states that any sequence containing four or more amino acids and ten or more nucleotides must be identified with a SEQ ID NO. Therefore, applicant must append SEQ ID Nos. to all mentions of specific sequences comprising more than four amino acids and more than ten nucleic acids in the specification.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1648

Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 16 is indefinite because it depends from claim "a". Presumably, the claim is intended to depend from claim 15, as it did before being amended, and will be treated as such for this action on the merits. However, this treatment does not relieve applicant of the burden of responding to this rejection.

***Allowable Subject Matter***

Claims 15, 17-24 and 35-47 are drawn to allowable subject matter because applicant has clearly satisfied all requirements under 35 USC 112.

The closest prior art is Frolov et al. (RNA. 1998; 4: 1418-1435). The instant claims distinguish over this reference because Frolov et al. do not teach or suggest an attenuated isolated pestivirus mutant with a growth-restricted phenotype comprising the 5'-GUAU conserved pestivirus sequence, a homologous IRES and alterations within stem-loops 1a and/or 1b.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 1648

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
